Nayla B

(647)807–9503

Toronto, ON

nayla.bambrah@gmail.com

Professional Summary:

Software engineering technology student specializing in Artificial Intelligence with practical experience in AI systems design, programming logic, and database and web development, with a proven ability to build full applications through academic projects.

Key skills:

Python (Numpy, Matplotlib, Pandas) | C# | Technical Documentation (SRS) | Agile | Statistics and Probability | Oracle SQL | HTML/CSS/Javascript | React.js | Node.js | Express.js | MERN stack | MongoDB | REST API | Microsoft Office | Microsoft Visio | Visual studio Code | Java | Git/Github | Copilot | Health Data analysis | HL7 | FHIR | EHR systems |

Education:

Software Engineering Technology | Artificial Intelligence — *January 2026 – Present*

Centennial College – Scarborough, ON

- Studying AI systems design, programming logic, and database concepts (Python, Java, C#, Unix/Linux)
- Building full–stack web applications, covering both front–end and back–end development
- Course work in database concepts, including designing, querying, and managing relational databases
- Applying AI and software design principles through hands–on academic projects

Bachelor of Health Studies — *September 2021 – October 2025*

York University – Toronto, ON

- Analyzed how political and institutional power structures shape health policy decisions and outcomes
- Learned principles of managing health care organizations, including resource allocation, planning, and operational decision making
- Used statistical methods to analyze related data sets and interpret trends
- Applied economic principles – cost–benefit analysis, resource scarcity, market forces

Projects

Car Rental System

- Created a car rental database using Oracle SQL Developer to organize and retrieve rental data

End to End Medical Chatbot — *In progress*

- Currently building a medical chatbot using Python

Smart Fridge Recipe Recommendation (SRS)

- A system that returns recipe suggestions that are tailored to the ingredients selected by the user

Healthcare website — *In progress*

- Currently building a full-stack responsive appointment booking website with HTML, CSS, & Javascript

Experience

Hostess | Stacked Pancake & Breakfast House — *August 2023 – July 2025*

Innisfil, ON

- Bussed and reset tables to keep the dining room and work areas clean
- Worked with POS systems to place orders and manage bills
- Prepared and served beverages as part of a full service guest experience
